

WORK EXPERIENCE

- Analytics Engineer | CVS Health**

Jan 2026 – Present

 - Engineered scalable **Snowflake**, **Databricks**, and SQL-based analytics models processing **120M+** healthcare records, reducing report generation time by **40%** across enterprise reporting platforms.
 - Developed automated **ELT** pipelines using **AWS Glue**, **Azure Data Factory**, and **PySpark**, improving data availability by **35%** while supporting critical healthcare analytics initiatives.
 - Architected **dimensional data models** and semantic layers enabling **Power BI** dashboards utilized by leadership teams to monitor **50+** operational KPIs.
 - Implemented advanced **data quality**, reconciliation, and validation frameworks that reduced reporting discrepancies by **30%** and strengthened regulatory reporting accuracy.
 - Optimized cloud data workloads across **Snowflake**, **AWS S3**, and **Azure Synapse**, decreasing processing costs by **25%** while improving platform scalability.
- Data Engineer | Cognizant**

Oct 2021 – Jul 2024

 - Built enterprise **ETL/ELT** pipelines using Python, SQL, **AWS Glue**, **Azure Data Factory**, and **Databricks**, processing **90M+** records monthly across multiple business domains.
 - Designed **Snowflake**, Redshift, and SQL Server warehouse solutions supporting business intelligence initiatives and improving reporting performance by **38%**.
 - Integrated structured and unstructured datasets from APIs, cloud storage, and relational databases, increasing data accessibility by **40%** for analytics teams.
 - Automated workflow orchestration and monitoring using **PySpark** and cloud-native services, reducing manual intervention efforts by **50%**.
 - Enhanced data transformation performance through query tuning, partitioning strategies, and optimization techniques, lowering execution times by **35%**.
 - Partnered with reporting and analytics teams to deliver trusted datasets powering **Power BI** and **Tableau** dashboards used across enterprise operations.
- Data Analyst | Transol Systems**

Aug 2019 – Sep 2021

 - Developed interactive **Power BI** and **Tableau** dashboards analyzing **25M+** business records, improving visibility into operational and performance metrics.
 - Performed advanced **SQL** analysis, KPI reporting, and trend identification supporting executive decision-making and increasing reporting efficiency by **30%**.
 - Created automated reporting frameworks utilizing SQL, Excel, and Tableau, reducing recurring report preparation efforts by **45%**.
 - Conducted data validation, reconciliation, and quality assurance reviews improving reporting accuracy and reducing data inconsistencies by **28%**.
 - Generated BI reports and analytical scorecards tracking customer, financial, and operational KPIs; collaborated with stakeholders to translate requirements into data-driven recommendations, improving process efficiency by **20%**.

PROJECTS

- DataVireon — AI Code Resolution Platform (Web + Mobile)**

Aug 2025 – Dec 2025

Python, FastAPI, Next.js, React Native/Expo, Supabase, Vercel, Render

 - Designed full-stack web and mobile application with **Python/FastAPI** backend, **Next.js** frontend, REST APIs, authentication, and production CI/CD deployment across 5 engineering roles with iterative testing. Live | GitHub
 - Built structured issue-scanning, debugging, and agentic resolution workflows; created reusable documentation for setup, deployment, and debugging to improve maintainability and knowledge transfer.
- AskDocs — Hybrid RAG Q&A System**

Mar 2025 – Jul 2025

Python, LangChain, Qdrant, RAGAS, Gradio, HuggingFace Spaces

 - Built hybrid retrieval pipeline over **3,000+** chunks with vector search, cross-encoder reranking, and **GitHub Actions** RAGAS evaluation gates achieving **Answer Relevancy 0.95**; applied prompt engineering and hallucination mitigation for reliable, grounded outputs. Demo | GitHub

LEADERSHIP & ACTIVITIES

- Datathon @ UTA | Organizing Team Member**

2025

 - Co-designed **8 AI/ML challenges** for a 24-hour hackathon with **200+ participants**; defined evaluation criteria, judging rubrics, and feedback workflows while mentoring teams on ML and data science solutions.

TECHNICAL SKILLS

- Analytics Engineering:** Analytics Engineering, Data Modeling, Dimensional Modeling, Semantic Layer Development, Data Transformation, ELT Frameworks
- Data Engineering:** ETL/ELT Development, Data Pipelines, Data Integration, Workflow Orchestration, Apache Spark, PySpark, Kafka, Apache Airflow, dbt, Hadoop
- Cloud & Big Data:** AWS (Glue, S3, Redshift, EMR, Lambda, Athena, IAM), Azure Data Factory, Azure Synapse Analytics, Azure Data Lake, Databricks, Snowflake, GCP
- Programming & Querying:** Python, SQL, PySpark, T-SQL, Java, JavaScript (Node.js), R, Shell Scripting
- AI/ML Technologies:** TensorFlow, PyTorch, Scikit-Learn, Hugging Face, NLP, XGBoost, RAG, RAGAS, Sentence Transformers, vector search, feature engineering
- Reporting & BI:** Power BI, Tableau, SSRS, Crystal Reports, Looker, Excel, Power Query, DAX, KPI Reporting, Dashboard Development
- Databases & Storage:** Snowflake, SQL Server, PostgreSQL, MySQL, Oracle, Amazon Redshift, MongoDB, Cassandra, Qdrant
- Data Governance & Quality:** Data Validation, Data Reconciliation, Data Cleansing, Quality Assurance, Metadata Management, Data Lineage
- Frameworks & Tools:** FastAPI, Flask, Django, REST APIs, Docker, Kubernetes, Git, CI/CD, Jira, Confluence, Agile, Linux, Terraform

EDUCATION

- Master of Science in Computer Science**

Aug 2024 – May 2026

University of Texas at Arlington, Arlington, Texas

GPA: 4.0
